

BioCote® the facts: The features and benefits of BioCote®

How well does BioCote® work?

BioCote® antimicrobial technology is effective against many microbes including bacteria and mold that can cause odors, staining and material degradation.

BioCote® **reduces the presence of microbes** on Waterlogic® water dispensers by **up to 99.99%**

BioCote® acts fast and can reduce the number of microbes on a protected product by up to

86% in 15 minutes and
99.5% in just 2 hours.

BioCote® is permanent and provides **built-in protection for the expected lifetime** of Waterlogic water dispensers.

BioCote® provides **continuous, around the clock protection** against microbial colonisation on Waterlogic dispensers.

BioCote® additives and Waterlogic water dispensers containing them **do not cause microbial resistance.**

With BioCote® antimicrobial protection, a Waterlogic water dispenser will:

Be more hygienic

- The water dispenser will not host microbes with the potential to negatively impact product performance.

Be easier to keep hygienically clean

- BioCote® technology is built in, and complements existing cleaning practices.

Stay fresher for longer

- By preventing the growth of microbes that cause bad odors or stains.

Reduce the potential for cross-contamination

- A more hygienic product means less microbes to transfer to other products in the same environment.

Have an extended usable lifespan

- By reducing the growth of microbes that can cause material degradation, BioCote® helps ensure the dispenser's long-term performance.

Information statement

BioCote® technology does not protect users or others against disease causing bacteria, germs, viruses or other harmful organisms. This technology is not a substitute for good hygiene and/or cleaning practises.
